

Mujtaba Khalid Alnaje Mohammed

Full Stack Developer
(React.js / PHP · Laravel)
mujtabakhalid1960@gmail.com
| +971 522163311 | Abu
Dhabi, United Arab Emirates

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience across React.js front-end development and PHP/Laravel back-end development, seeking to contribute to Dev Centre House's web application projects in Abu Dhabi. Comfortable working across the full stack: building responsive, visually polished user interfaces, developing server-side logic and RESTful APIs, working with MySQL databases, and integrating third-party services. Strong problem-solving ability and clear client communication, with a track record of delivering end-to-end features independently and as part of a cross-functional team. Committed to code quality, performance optimization, and reliable, scalable deployments.

CORE SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Tailwind CSS, REST API Integration
Backend: PHP, Laravel, RESTful API Development, Server-Side Logic, Third-Party Service Integration
Database: MySQL, SQL Database Management, PHPMyAdmin, XAMPP
Performance & Quality: Code Reviews, Debugging, Cross-Browser Testing, Application Optimization, Scalability
Tools: Git, GitHub, VS Code, Postman, Figma

PROFESSIONAL EXPERIENCE

IT Support & Digital Operations — Westb Legal Translation (Fikra), Abu Dhabi, UAE

May 2026 - Present

- Provide IT support and technical troubleshooting for day-to-day hardware, software, applications, and user issues.
- Manage company social media pages and support digital marketing activities across online channels.
- Design, manage, and maintain company websites, including content updates, technical improvements, and website performance.
- Design and optimize landing pages for marketing campaigns and lead generation.
- Set up, manage, and monitor paid advertising campaigns through Google Ads and Meta Ads Manager.
- Improve website SEO and online visibility, and analyze website traffic, conversions, and campaign performance using Google Analytics (GA4).

Front-End Developer — Brandegic Company, Umm Al Quwain, UAE

Jan 2025 - Jan 2026

- Built responsive layouts and reusable UI components with React.js, improving mobile usability across 4 internal pages by 40%.
- Integrated REST APIs using the Fetch API to load dynamic content; added error and loading states, cutting failed requests by 30%.
- Collaborated with cross-functional teams on end-to-end feature delivery, from UI implementation to API integration.
- Debugged cross-browser and cross-device issues, reducing reported front-end bugs by 20% through targeted fixes and testing.

Front-End Developer — Tirhal Company, Sudan

2022 – 2024

- Managed and maintained company web pages, including content updates, layout adjustments, and visually appealing UI fixes.
- Diagnosed and resolved functional and visual bugs using browser dev tools and error logs, ensuring quality and performance.
- Performed routine WordPress maintenance: plugin updates, backups, and security patches.
- Implemented responsive design fixes for consistent display across major devices and browsers.
- Optimized page assets (image compression, CSS/JS minification) for maximum speed, reducing average load time by 20%.

EDUCATION

Bachelor of Software Engineering — Karary University, Sudan

2018 – 2025 | GPA: 3.30

PROJECTS

Royal Voltage Electro Mechanical Works Website — React.js, TypeScript, Vite

- Developed and deployed a responsive corporate website for an MEP company covering electrical, mechanical, plumbing, low-current, and solar services. Implemented interactive project galleries, contact and careers forms, EmailJS integration, responsive layouts, SEO configuration, and custom-domain deployment.
- Live: royal-voltage.ae

Royal Solar Website — React.js, TypeScript, Vite, Three.js, GSAP

Designed and developed a modern interactive website for a solar energy company with 3D and motion-based experiences. Built an interactive 3D solar panel using Three.js and React Three Fiber, GSAP scroll animations, solutions and projects sections, performance optimizations, responsive layouts, and production-ready deployment.

FIKRA Business Consulting Website

Designed and developed a bilingual Arabic and English business website for FIKRA, focused on company formation, project consulting, and business development services. Implemented responsive layouts, service sections, landing pages, WhatsApp conversion flows, SEO optimization, and digital marketing integration.

Clinic Booking System — React.js, Laravel, PHP, MySQL

Developed a full-stack clinic booking application with a React-based front end and Laravel backend. Implemented authentication, appointment-related functionality, REST API integration, MySQL database management, and backend API development using Laravel Sanctum.

Personal Portfolio Website — HTML, CSS, JavaScript

Designed and developed a responsive personal portfolio website to showcase web development projects, technical skills, and professional experience. Optimized the website for different screen sizes and deployed it using GitHub Pages.
